RESEARCH INTEREST

My current research interests are mobile and ubiquitous computing, including designing and implementing ubiquitous and wireless sensing systems for Internet-of-Things applications (localization, smart homes/buildings, vital sign monitoring/healthcare, and 3D human-mobile interaction). Besides, I have a broad interest in wireless network as well. Currently, most of my projects are based on acoustic signals on commercial off the shelf mobile devices.

EDUCATION

- **Nanjing University** Nanjing, China
M.S. in Computer Science and Technology; Average Scores: 88.7/100
Advisor: Wei Wang
Sep. 2019 - Current
- **University of Electronic Science and Technology of China** Chengdu, China
B.Eng - Networking Engineering; GPA: 3.83/4.0
Elite Class: Liren Leadership Class
Sep. 2015 - Jul. 2019
- **National Chiao Tung University** Taiwan, China
Exchange Student - Electrical and Computer Engineering; GPA: 4.15/4.3
Feb. 2017 - Jul. 2017

PUBLICATIONS AND RESEARCH

- RespTracker: Multi-user Room-scale Respiration Tracking with Commercial Acoustic Devices
• **Haoran Wan**, Shuyu Shi, Wenyu Cao, Wei Wang and Guihai Chen
IEEE INFOCOM 2021, Apr. 2021.
- VECTOR: Velocity Based Temperature-field Monitoring with Distributed Acoustic Devices
• **Haoran Wan**, Lei Wang, Ting Zhao, Ke Sun, Shuyu Shi, Haipeng Dai, Guihai Chen, Haodong Liu and Wei Wang
ACM IMWUT 2022, Revised Version Submitted in May 2022.
- Multi-user Room-scale Respiration Tracking using COTS Acoustic Devices
• **Haoran Wan**, Shuyu Shi, Wenyu Cao, Wei Wang and Guihai Chen
ACM TOSN 2022, Under 1st Round of Major Revision.
Extended version of INFOCOM 2021 paper
- SCALAR: Self-Calibrated Acoustic Ranging for Distributed Mobile Devices
• Lei Wang, **Haoran Wan**, Ting Zhao, Ke Sun, Shuyu Shi, Haipeng Dai, Guihai Chen, Haodong Liu and Wei Wang
IEEE TMC 2022, Under Review.
- HeadTracker: Fine-grained Head Orientation Tracking System Based on Headphones
• Jinpeng Song, Haipeng Dai, Shuyu Shi, Lei Wang, **Haoran Wan**, Zhizheng Yang, Fu Xiao, and Guihai Chen
Springer WASA 2022, Under Review.
- ALT: Boost AI Inference Performance by Breaking the Wall between Data Layouts and Loops
• Zhiying Xu, Shuyu Shi, Jiafan Xu, Hongding Peng, Wei Wang, Xiaoliang Wang, **Haoran Wan**, Haipeng Dai, Kun Wang, and Guihai Chen
ACM ASPLOS 2023, Submitted in Jul. 2022.

PROJECTS

- **Generating Points Cloud with Distributed Acoustic Devices** Apr. 2022 - Now
 - Try to leverage ubiquitous COTS acoustic transceivers, including laptops, mobile phones, and voice assistants in domestic environments to form a self-organized distributed sensing scheme and generate precise points cloud features (range, angle, velocity, reflection strength and .etc).
 - Challenges include 3D rigid body devices localization with 6 degrees of freedom, identifying the reflection patterns from the same object in different receiving end, and new algorithms in speed and angle estimation that are more suitable for home scenario.
- **Air Temperature Field Reconstruction with COTF Acoustic Devices** Apr. 2021 - May. 2022
 - Estimate the air temperature with shorter response time than traditional temperature sensors by monitoring the speed changes of sound signal. Achieve average errors 0.25°C across months of evaluations.
 - Combine Radon transform and Taylor Series to reconstruct the air temperature field with decimeter-level spatial resolution using multiple acoustic devices.
 - Leverage LOS paths and reflections to estimate the temperature in multiple slots in a car or on the table with only one pair of devices.
 - This work was submitted to IMWUT in Nov. 2021 and revised version was submitted in May. 2022.

- **High Accuracy Localization System between Distributed Devices** Aug. 2020 - Mar. 2021
 - Model the sampling frequency offset between distributed acoustic devices precisely.
 - Cancel the frequency offset and unknown delays in sound playback and recording process between devices in real time, and return the absolute distance measurement without user's intervention/calibration.
 - Achieve 0.6 mm 1D localization errors up to 3 m and 1.86 mm 3D localization errors. Maintain the accuracy in long-term without performance drop (up to 8 hours).
 - This work was submitted to TMC 2022.
- **Multi-user Room-scale Respiration Tracking using COTS Acoustic Devices** Oct. 2020 - Aug. 2020
 - Expand the acoustic based respiration sensing range to 3 m by combining multiple reflection paths.
 - Separate multiple users with modulated Zadoff-Chu sequence, and can recover the breath patterns for at least 4 users in the same room simultaneously.
 - Track users by re-synchronizing the reflection signals before and after users move.
 - This work was accepted by INFOCOM 2021.
- **In-air Continuous Hand Gesture Recognition with Acoustic Signal** Nov. 2019 - Feb. 2020
 - Develop a continuous hand gesture recognition system on mobile phone with acoustic signal, cooperating with Huawei.
 - Solve the practical problem of ambiguous gestures in continuous using scenario, e.g. scrolling up is similar to the reset process of scrolling down in consecutive use.
 - Design and deploy signal processing algorithm and deep learning model on mobile phone that run in real-time.

HONORS AND AWARDS

- Outstanding graduate students of Nanjing University - Dec. 2021
- Huawei Graduate Scholarship - Nov. 2021
- Principal Special Scholarship for PhD Students - Nov. 2019
- Second Class People's Scholarship - Nov. 2016, 2018
- Undergraduate China National Scholarship, Nov. 2017

SKILLS SUMMARY

- **Languages:** Python, MATLAB, Java, C/C++, SQL, Bash, Verilog
- **Tools:** Scikit, Pytorch/TorchLightning, TensorFlow, Keras
- **Platforms:** Linux, Raspberry, Android, FPGA, Microcontroller
- **Domain Knowledge:** (Array) Signal Processing, Machine Learning, Wireless Network

EXPERIENCE

- Digital Logic Design and Computer Organization Nanjing, China
Teaching Assistant Sep. 2021 - Jan. 2022
- Digital Circuit and Digital System Experiment Nanjing, China
Teaching Assistant Sep. 2020 - Jan. 2021
- ChinaSoft International Chengdu, China
Student Developer (Intern) Jul. 2017 - Aug. 2017
- Chengdu Modern Hospital Chengdu, China
Volunteer for Elderly Caring Jul. 2016
